edudictive

Preparing for future

"*If opportunity doesn't knock, build a door.*"

About us

Edudictive is an initiative by a group of engineers from DTU, IPU & IIIT Delhi to promote the idea of skills and skillsetthat would create entrepreunial mindset among students. We believe in starting at a very young age (as kids being the age group 10-18) and possessing an excellent mindset & creativity.

Building a network, possessing worthy skills & starting early will ultimately open a lot of opportunities. Spending an hour a day from the very early age would be better than spending 8 to 10 hours a day at the peak of their careers.

Our mission is to create the creators, job givers instead of job seekers.

Our Programs

Skillowl Labs

Its practical training program focused to promote entrepreneurial mindset among students of age group 10-18, that will help students to be on a path to entrepreneurship from very early age.

It comprises of following 4 courses for 18-20 weeks round the year:

- Graphic designing (5 weeks)
- Website development (10 weeks)
- Content & blog writing (3 weeks)
- Entrepreneurship (3 weeks) Interschool competitions would be organized/conducted.

All the above courses are structured along with some projects

Trion Summer Camp

It is roughly a 4-week program and comprises of following competition based programs (select any three) :

- Internet of things
- Business plan
- Understanding finance & investment know-how
- Robotics
- 3D printing
- Graphics designing
- And many more....

It also includes a complimentary educational/corporate trip.

Customizable Programs

This plan can be structured as per school demand.

Schools can opt for different programs from the following ones :

- Web development
- App development
- Understanding finance
- Corporate/educational trips
- Robotics
- IOT
- 3D printing
- Graphics designing and many more...

"Don't try to do everything by yourself, but try to connect with people and resources. Having that discipline and perseverance is really important. "

-Chieu Cao, Co-founder of Perkbox

edudictive
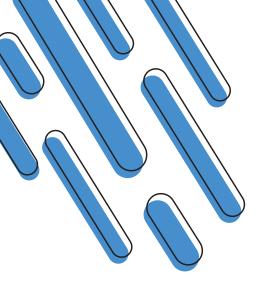

Advantages of such programs

The courses that we are offering inculcate skillset that will enhance creativity level, critical thinking & problem solving ability of students. This will ultimately help them in other academic as well as co-curricular activities, along with this they will also become financially independent by utilizing those skills.
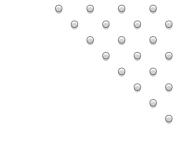

Why school students should focus on entrepreneurship and skill development ?

Entrepreneurship education teaches students crucial life skills, such as :
• How to collaborate and work with a team
• How to speak in public and prepare an effective presentation
• How to collect and analyze data
• How to use social media as an advocacy tool
• How to solve real, complex problems that don't have a definitive answer
• How to use curiosity and creativity to find an innovative approach to difficult problems
• Prepare students for an uncertain future.
• Leave room for creativity and collaboration.
